IDShield™

Why IDShield?

Identity theft has been one of the top consumer complaints filed with the Federal Trade Commission (FTC) for over 15 years. According to the Consumer Response Annual Report from the FTC, 55% of the credit or consumer complaints received by the Bureau of Consumer Financial Protection were about incorrect information appearing on credit reports.¹

Protecting Your Bottom Line

IDShield is the most comprehensive identity protection and restoration product available. Our one bureau service monitors a participant's TransUnion credit report and triggers an alert when their personally identifiable information (PII) appears on a credit check – giving them the chance to review potentially fraudulent activity.

Best In Class Monitoring

We monitor participants' identity from every angle, not just their Social Security number, credit cards and bank accounts. With High Risk Application and Transaction Monitoring, we check to see if the details connected to a participant's identity are safe. If any change in status occurs, they'll receive a push notification or email alert immediately.

64%

of Americans have personally experienced a data breach.

49%

feel that their personal information is less secure than it was 5 years ago.

41%

have encountered fraudulent charges on their credit card.

High Risk Application and Transaction Monitoring

Financial institutions use specific technology to verify the identity of new account holders before processing high risk transactions. IDShield monitors these processes to determine if details for a new bank account or large money transfer are associated with your personal data. Our application and transaction monitoring can potentially catch identity theft 90 days faster than traditional credit monitoring alone. Furthermore, IDShield can better secure your online financial records by monitoring unauthorized use of username and password combinations used for online banking or insurance accounts.

Lost/Stolen Wallet Assistance

Losing a wallet can be stressful, but our investigators are here to assist. We offer guidance to determine what may have been stolen and provide support for any resulting identity theft.

Only IDShield provides direct access to Licensed Private Investigators to help resolve identity theft and related issues.

Medical Data Report

Offers a link to medical data reports that you can review for inaccurate or fraudulent information.

Death Index Monitoring

IDShield searches the National SSN Death Index and will send an alert if the participant's information is found in the database.

Financial Threshold Account Monitoring*

Receive an alert on financial withdrawals, balance transfers and large purchases on financial accounts for transaction made in excess of a set monetary amount. Includes checking, savings, 401k accounts, loans and more.

Reputation Management

Scans your social media accounts for existing content that could be damaging to your online reputation. Post and comments that contain harmful language or images will be flagged for review.

Reputation Score

Ranks your online reputation risk by giving you a score based off the content found on your social media accounts. We'll offer tips to improve your score and flag social posts that might contain harmful images or language.

Social Media Monitoring

IDShield monitors popular social media platforms like Facebook, LinkedIn, Twitter, and Instagram for information that may put your privacy at risk, such as home address, email address, date of birth and Social Security number.

Court Records Monitoring

Searches online court records for multiple different PII elements. We search millions of criminal records across local, state and federal data sources including county courts, Department of Corrections, Administration of the Courts and other legal agencies to see if your personal information has been used.

Payday Loan Monitoring

IDShield provides non-credit loan monitoring for short-term payday or similar cash advance loans. We screen online, rent-to-own and payday lender storefronts for unauthorized activity.

Telecom Monitoring

Monitors more than 1.5 million phone records to ensure that your phone number is not being redirected.

Address Change Monitoring

Monitors your United States Postal Service address history through the National Change of Address database, providing an 18-month snapshot of the nearly 40 million Americans who move each year. This service scans for change of address requests and sends a notification if your information appears in the database.

Enhanced Sex Offender Monitoring and Alerts

Participants can learn if a registered sex offender lives near them. They'll also receive alerts when a new offender moves into their neighborhood, out of their neighborhood or if someone in their neighborhood becomes registered. Participants can search within a five-mile radius of their home address.

*We do not monitor all transactions at all businesses and the monitoring network is limited only to institutions participating in the financial monitoring feature.

Unlimited Consultation

Participants have unlimited access to consultation with an identity theft specialist who can provide advice on any identity-related issues or concerns. A participant doesn't have to be the victim of identity theft to take advantage of our consultation services.
